

Adige Rafting was founded in 2004 by an experienced team of river guides in Verona. Our excursions don't require any specific skill and are open to everyone, even kids and non-swimmers. Adige river's safe and gentle waters allow to experience soft rafting accompanied by an expert and licensed rafting guide - (F.I.Raft.- Italian Rafting Federation).

A river trip aboard a raft through Verona is a fantastic opportunity for a person of any age and ability to appreciate a fascinating and enchanting city from the river. The trip begins with the distribution of river gear consisting of a life jacket and a paddle. This is then followed by a short briefing about how to paddle effectively. Our unique guided river excursions through the city allow for our guests to combine physical and cultural experiences. Paddling a raft with others on the gentle flow of the Adige brings a sense of physical satisfaction that is only achieved by river travel. The cultural component of the trip unfolds as guests admire important sights from a river perspective and are explained how the river Adige was so important for the building and development of the old city. However the river offers three different spots along the descent where paddlers can enjoy waves and soft white water. On the last part of the trip we organize a 10 minutes race among the rafts.
